

LACK OF SKILLED STAFF IN PRODUCTION?

Experience-based knowledge is a decisive factor for efficient production. If this is missing, it leads to high **operating and disposal costs**.

With our MADDOX software, you can digitise the **experience of your employees** in production and technology.

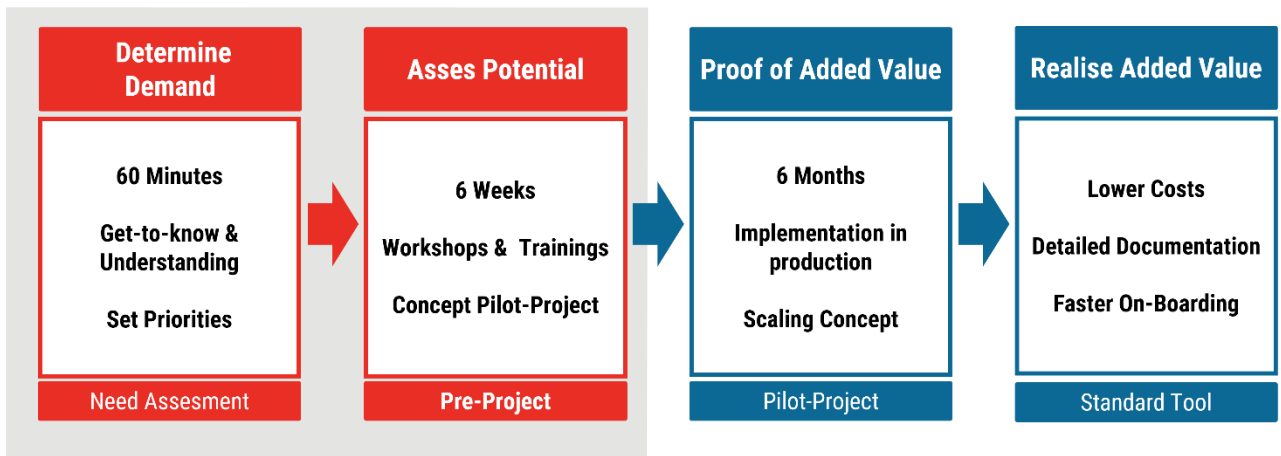

MADDOX digitises experiential knowledge and proactively supports in the event of disruptions in production.

WHAT POTENTIAL HAS MADDOX FOR YOU

We want to get to know your company and your production as well as your communication processes. That knowledge helps us to design a **pilot-project suitable for your company** at the lowest possible cost and time. Our goal is to make your **benefits tangible through MADDOX**.

In the context of **workshops, discussions and training sessions**, we get a good overview and offer you **interesting insights** into the topics of **production-digitalisation, machine learning and change management**. We revert to our own expertise as well as to tools and experience from established partners. Therefore, we offer you **instant added value, even before the pilot project begins**.
